

# ROTAMATE pro

Laser cutting system

Highly productive laser cutting system for manufacturing rotary die boards

- Laser power from 1000 up to 3000 watts
- Working area: 3000 mm (118"), rotary diameters 174 to 800 mm (7 to 105")
- Modern and highly dynamic magnetic linear drives with integrated displacement encoder systems
- Milling unit **QUICKMILL** with 6 position tool changer
- Fast engraving head **QUICKSCAN**
- Automatic shaft height control
- Quick and user-friendly change of material
- Collision protection system Crash Protec
- Dynamic topology measuring system **QUICKTOP**
- External material preparation with **PREMAKEREADY evo**
- State of the art CNC technology with touch screen interface
